Portfolio

Education

Maharishi Markandeshwar (Deemed to be) University

Sept 2022 – May 2026

B.Tech in Computer Science and Engineering — CGPA: 7.2

Mullana, Haryana

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS

Libraries / Frameworks: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS

Databases: MongoDB, MySQL, Firebase

Cloud Platforms: AWS (EC2), Google Cloud Platform

Tools: Git & GitHub, VS Code, IntelliJ IDEA, Figma

Testing: Unit Testing, Postman

CS Fundamentals: DBMS, OS, CN, OOPs

Experience

CEERAS (Remote)

Feb 2025 – Jun 2025

MERN Stack Developer Intern / Project Lead

- Led development of an OYO-style booking platform handling 1,500+ weekly sessions.
- Reduced support queries by 30% and improved API response time by 25%.
- Managed a team of 3 developers and ensured 100% on-time sprint delivery.

Projects

GrowX | [Live] [GitHub]

Aug 2025

- Architected a full-stack career growth platform integrating **7+ modules** including Learning, Quiz, Kanban, Resume Builder, Internship, ATS Checker, and Jobs.
- Implemented secure role-based authentication for **2 user types** (Admin/User) using JWT, protected routes, and encrypted credentials.
- Developed Admin and User dashboards supporting **10+ CRUD workflows** for job posting, applicant tracking, quizzes, and learning progress.
- Enhanced UX with responsive UI, Redux Toolkit state management, and deployed scalable REST APIs on Render.

Compile Hub | [Live] [GitHub]

May 2025

- Developed a scalable real-time online compiler supporting **25+ programming languages** with syntax highlighting and live code execution.
- Designed **role-based authentication (User & Admin)** with profile management, execution history tracking, and admin monitoring dashboard.
- Integrated **coding practice and interview modules** with curated problems, test cases, and real-time evaluation for skill assessment.
- Displayed advanced runtime insights including **execution time, memory usage, and algorithmic complexity analysis (time/space)**.
- Secure code execution on **Render host**, ensuring scalability and isolation.

SkillSwap | [Live] [GitHub]

Jan 2026

- Developed a full-stack Skill Swap Marketplace enabling users to exchange mentorship sessions across **10+ skill categories**.
- Implemented JWT-based authentication with role-based access control for **2 roles** (User/Admin) and protected private routes.
- Built core modules including skill posting, swap request workflows, and session scheduling with **4+ request statuses**.
- Integrated Socket.io real-time chat, notifications, and reviews/ratings to enhance user interaction and trust.

Achievements

- Led a **3-member team** to deliver multiple MERN stack projects, reducing deployment time by **80%**.

Certifications

- Full Stack Development Certification** — GeeksforGeeks
- Basic MongoDB Certification** — HackerRank
